The Original

No other BODUM® product has been copied more than our Chambord line. Originally for coffee lovers seeking the perfect cup of coffee. These days Chambord is produced and even when we chrome-plate, we don't compromise our environmentally - Excellent design has to be affordable for everyone.

introduced in France in the fifties, it's become an icon all over the world in Portugal by our skilled craftsmen. We only use the best of materials, friendly standards. Yet, even so, we match the price of our cheap imitators.
